

MY DASHBOARD

EMERGE AS A CHAMPION

Remember! Do not share any of your API keys with anyone. They are tied to your League of Legends account and are used for your applications. If someone gets access to your key, they can use it for their own purposes, leaving you with a severely diminished rate limit – even entering your key into another application can be dangerous! We don't want anyone else consuming your traffic and making it impossible for you to build your app. Protect your key so that you can make awesome stuff!
